Full Paper submission by 20th March 2023.

The length of the paper should be within 3000 words including images and diagrams.

Article Publication Charges:

The author(s) will be notified once the paper is accepted for publication after peer review.

Concept Note:

The North East India Region has a diverse cultural, religious, and linguistic heritage. It also has a unique landscape and a variety of natural resources. Because the region is rich in natural resources and biodiversity, sustainable development is a critical concept in North East India. Due to rapid population growth, industrialization, and climate change, the region faces a number of challenges in terms of socioeconomic development, environmental conservation, and sustainable development. To address these issues, it is critical to understand the region's environmental and social dynamics and develop strategies for long-term development. Studying sustainable development in North East India can aid in identifying the region's key challenges and opportunities, as well as developing strategies to ensure long-term development.

It can also help to identify the region's potential for economic growth and development, while also protecting the environment and promoting social justice.

The region of North East India is distinct and diverse, with its own set of challenges and opportunities. This edited book seeks to investigate various perspectives from North East India on the region's challenges and opportunities for sustainable development. The book will serve as an interdisciplinary forum for researchers and practitioners to discuss various aspects of sustainable development in India's North East. Contributions will be made by researchers, practitioners, and policymakers from a variety of disciplines, including economics, sociology, anthropology, political science, public policy, environmental studies, and others. We invite contributions from scholars and practitioners on topics related to sustainable development in the North East region of India.

The book will focus on the following topics:

- Sustainable development in North East India: Challenges and Opportunities
- Environmental conservation and management in North East India
- Climate change and its impacts on North East India
- Renewable energy and energy efficiency in North East India
- Sustainable agriculture and food security/ urbanization and infrastructure/ tourism and cultural heritage/ livelihoods and poverty alleviation in North East India
- Sustainable use and management of natural resources in North East India
- The role of traditional knowledge and practices/role of education in sustainable development
- The role of civil society and grassroots movements in promoting sustainability
- The role of the state in promoting sustainable development
- Governance and Policy in North East India

The sub-themes are only illustrative in nature. Any paper on the Broad Theme is welcome.

Author Guidelines:

The author(s) should submit original research findings that have not been previously or concurrently published elsewhere. **For each paper, only two authors are permitted.**

Manuscript:

The authors are requested to prepare their manuscripts in accordance with the instructions/specifications provided below.

General Requirements:

The abstract should be no more than 250 words long, in 10-point Times New Roman, and include five keywords. The length of a research paper should not exceed 3000 words. All manuscripts must be typed 1.5 spaced and in Times New Roman 12-point font. All sides must have margins of at least 0.8 inch (2 cm).

The manuscript must be written in simple, clear English. The authors are responsible for all aspects of manuscript preparation. The Editors will not make extensive changes or rewrite the manuscript.
